Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 August 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over by Ramaswamy, US Patent No. 5,203,103.

Claims 1-10 are product by process claims and Ramaswamy teaches the treatment of oat hulls, (claims 7 and 8), with an acid for dietary product, see abstract and column 5, lines 40-44. In the latter column 5, Ramaswamy teaches that the bleached fibers are treated with an acid, hydrochloric acid, for neutralizing the bleached fibers. Ramaswamy teaches the same ratio of cellulose/hemicellulose as claimed, see column 5, lines 12-18. The fibers disclosed by the reference, Ramaswamy, seems to be the same as the ones claimed. In the event any differences can be shown for the product -by-process claims 1-10, as opposed to the product taught by the reference Ramaswamy, such differences would have been obvious to one of ordinary skill in the art as routine modification of the product in the absence of a showing unexpected results, see *In re Thorpe*, 227 USPQ 964 (CAFC 1985)

As the afore mentioned claims are product by process claims, it is deemed that "[A]ny difference imparted by the product by process claims would have been obvious to one having ordinary skill in the art at the time the invention was made because where the examiner has

Art Unit: 1731

found a substantially similar product as in the applied prior art the burden of proof is shifted to the applicants to establish that their product is patentably distinct, ..." In re Brown, 173 U.S.P.Q. 685, and In re Fessmann, 180 U.S.P.Q. 324.

Further, "[P]rocess limitations are significant only to the extent that they distinguish the claimed product over the prior art product." In re Luck, 177 U.S.P.Q. 523 (1973).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kinsley, Jr., US Patent No. 4,557,800, referred hereafter as Kinsley.

3. Kinsley teaches a cellulosic pulp in which the pulp is treated to reduce the lignin content, while maintaining most of the cellulose and at least 10% of hemicellulose, see column 2, lines 17-31 and column 7, lines 3-17. Kinsley teaches also the pulp can be obtained from any suitable source, column 3, line 64 through column 4, line 11. In Table II, Kinsley shows cellulose content of 87% of the treated material, Commercial Pine Kraft, for this particular case. Therefore, Kinsley seems to show a fiber which is at least substantially similar to the ones claimed and in the event any differences can be shown for the product -by-process claims 1-10, as opposed to the product taught by the reference Kinsley, such differences would have been obvious to one of ordinary skill in the art as routine modification of the product in the absence of a showing unexpected results, see In re Thorpe, 227 USPQ 964 (CAFC 1985).

As the afore mentioned claims are product by process claims, it is deemed that "[A]ny difference imparted by the product by process claims would have been obvious to one having ordinary skill in the art at the time the invention was made because where the examiner has

Response to Arguments

4. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the art of "Fiber Products."
